Description of the program

Java is one of the world's most widely used programming languages, hence it has been used as the primary language for the exercises in the Reskill training program. Java is an object-oriented, independent platform and has great performance, which means that the language has a wide range of applications and many companies use it to develop software systems, build platforms and apps.

Program Content

Programming Fundamentals
 Problem Solving
 Responsive Web Design
 Version control using GIT
 Functional Programming
 Object Oriented Programming (OOP)
 Test Driven Development (TDD)
 Agile Methodologies

Java
 JavaScript
 HTML and CSS
 React
 Introduction to C#
 SQL Databases
 DevOps with CI/CD
 Cloud Computing with Azure

AW Academy

At AW Academy, we believe that learning is a process that occurs when the individual interacts with others, to embrace and implement knowledge, skills, and competence. Consequently, we place great emphasis on identifying and developing the individual's capacity for learning. Besides learning new subjects' areas, individual's at AW Academy, get to practice our pedagogical methods which lays a great foundation for their skill in learn-to-learn.
